

489

490 **Fig. 4.** Effects of dietary coated CuSO_4 and ZnO on relative taxonomic abundance at the genus
 491 level (a) and relative abundances of *Agathobacter*, *Terrisporobacter*, and *Limosilactobacillus*
 492 (b) of fecal microbiota of weaned pigs ($n = 3$). CON = basal weaner diet based on corn and
 493 soybean meal, T1 = CON + 2,500 ppm standard ZnO , T2 = CON + 100 mg/kg dietary coated
 494 CuSO_4 and 100 mg/kg dietary coated ZnO , T3 = CON + 200 mg/kg dietary coated CuSO_4 and
 495 200 mg/kg of dietary coated ZnO .
