

Fig. 6. Effect of taurine and temperature on the expression of MAPK/ERK-Nrf2 signalling related genes in satellite cell. Values are presented as mean \pm standard error. ^{a,b}Different letters represent statistically significant differences within 37°C ($p < 0.05$). ^{A,B}Different letters represent statistically significant differences within 42°C ($p < 0.05$). The asterisks represent statistically significant differences in expression levels (* $p < 0.05$, ** $p < 0.01$, *** $p < 0.0001$).
