

430 Fig. 6. Assessment of residual (a) phosphorus, (b) sodium and (c) glucose content (mean \pm std. dev., wet basis) in beef *longissimus*
 431 muscle from non-rinsed (CN, n=12) compared to RC carcasses (RC3, 3°C rinse solution; n=13; RC14: 14°C rinse solution; n=15).
 432 ^aMeans no differences ($P > 0.05$, S.E.: phosphorous, 19.81; sodium, 27.14; glucose, 0.39) were found between the non-rinsed controls
 433 and either of the rinse temperature beef samples [22].
